

God-Caused Threat #6

TSUNAMI

NOTES

THE 1949 CANARY ISLAND QUAKE CRACKED LA PALMA ISLAND AND DROPPED ITS ENTIRE EAST RIDGE 16 FEET.

ANOTHER QUAKE OR THE AWAKENING OF LA PALMA'S CUMBRE VIEJA VOLCANO COULD COLLAPSE THE RIDGE AND SEND A 600 MPH PRESSURE WAVE AT THE U.S.. THE TSUNAMI WOULD BE HALF-MILE HIGH AND FLOOD THE EAST COAST UP TO 30 MILES INLAND.

THE CANARY ISLANDS HAVE BEEN QUIET UNTIL JUNE 2012 WHEN 3000+ QUAKES WOKE UP THE EL HIERRO VOLCANO, JUST TO THE EAST OF LA PALMA.
