

Part 4 of ISLAM Versus CIVILIZATION

by Kurt Saxon

This war is being fought by extorting billions from the taxpayers and by bribing Muslims. Billions have been spent in preventing unattempted attacks. The Department Of Homeland Security has squandered their billions to justify meaningless security measures.

Many have said that all the threats passed on by the DHS have only been "wolf crying". The response has always been that the wolf is out there, just waiting until our guard is down and we stop filling the pockets of DHS frauds.

But the sorry truth is that America is totally vulnerable because of the millions of potentially hostile Muslims let in here by our ignorant politicians. It is only because of bribing their leaders that they haven't struck nationwide.

Unlike most Americans, Muslims have little initiative. They only do what they are put up to. Even the shoe-bomber had his bomb made for him and was put up to it. But any Muslim leader could send his operatives out to cause the crippling of our economy, and at no risk to himself or even his flunkies.

Say, for instance, Ahmed sent ten Muslims to ten different Wal-Marts nationwide. Each would have a two liter pop bottle of gasoline with detonator as described in "Clarence And The Gay Martians". The bottles would be put in the soft drink section and would explode in about thirty seconds. The ten Muslims would have synchronized their watches and, at the same time of day, ten Wal-Marts would be horribly fire-bombed. Within an hour, every Wal-Mart would be emptied and closed, even if there were no fatalities. Maybe they would never reopen, since there could be no defense against such attacks.

Ten suicide bombers could be sent to board planes with disguised bombs in their carry-on luggage. Due to incompetence, five would be caught but five planes would go down. And what of explosives with timers sent as unchecked cargo?

Perhaps ten others would board planes, each carrying several PVC

tubing match-head bomblets, undetectable but powerful, their shrapnel tearing through strong industrial screen as if it were not there. These are shown in my VTS CD-ROM. A Muslim would go into the John, quickly light several, and then throw them among the passengers. He would probably be lynched by the passengers, but the airlines would be out of business, since there is no defense against such weaponry.

An examination of my bomb component recognition CD-ROM should convince anyone that there is simply no protection against most improvised destructive devices. Muslims don't need hijacked planes or vehicle bombs. Tactics geared to destroy our economy are more sure of success. So why haven't the Muslims carried out their threats to destroy "The Great Satan"?

As much as I despise Muslims, I know that among the billion, three hundred million, plus Muslims, there must be hundreds just as knowledgeable about improvised weaponry and destructive devices as am I.

Most people think Islam is a religion. It's not. It's a system of mind-control run by their clergy who determine what knowledge a believer can be trusted with. So some are permitted the knowledge to deal with the real world.

Today, the part of the real world most important to Muslims is money, and how to extort it for their cause. The clergy and their favorites gear their lives to getting money. Saddam used his revenues from oil and his other scams to pay off his cronies and all those loyal to him or a potential threat but useful. It's the same with the Saudi royal family who pay off the radicals who would otherwise overthrow them.

Of course, you find the same lust for money among our own leadership. During the Vietnam war our government traded 59,000 American lives for defense contracts.

9/11 was a surprise, but a stroke of luck to Dick Cheney and George Bush, both multi-millionaires who have never missed a meal or worked for one. Both of them see our soldiers only as expendable dollar signs.

Afghanistan was a money-maker for a while. But when the cash-flow, began to dwindle, Iraq looked like a real bonanza, and it has been, as the taxpayers have routed billions into defense contracts, just like in Vietnam.

Also, more billions went into payoffs of Saddam's old cronies and the present Muslim clergy. Even so, little of the eighty-seven billion will trickle down for actual rebuilding. It will hardly afford the ammo dissidents use to kill Americans and for wedding celebrations.

You must realize that the Muslims here can destroy our system at any time. I don't know when it will happen. But as soon as some Muslim chief feels slighted or under-bribed or when the money runs out, Wal-Mart will close, planes will go down, subway cars will fill with corpses and our country will enter a depression which will make the Great Depression seem like boom-times.

So I advise you to set aside your grade-school patriotism and know that our system, our government, our corporations, have become like a super mafia, run on bribery and corruption.

Your only chance to defend and maintain your territory is to collect practical knowledge. Our CD-ROM Super Sale has been reinstated with the addition of our bomb component recognition CD-ROM, a \$455 value, for only \$100 postpaid. Order while the sale lasts or consider converting to Islam. [Click here](#) for ordering details.
